

Running a week on /parallel

For payroll, each Monday while FastTrack still pays: is the new system pricing last week the way FastTrack did? About five minutes. Open crewright.com.au and sign in — only an owner or administrator sees this.

1. Open Parallel run

On the home page. It compares a week FastTrack has interpreted with the same week priced by the new system.

3. Read the summary

"Matched" is FastTrack's pay matched to the cent; "matched or explained" adds differences with a known reason.

ed, each tested line by line: anything else is a real difference.		
LINES		DOLLARS ON THEM
15		\$2,427.50
x		\$2,540.00

5. Open a timesheet

Each day side by side — FastTrack's lines and the new system's — with the reason for any difference.

2. Load last week

Choose the Timesheet Detail export and the Detailed Transaction Report, same dates, then press Load and compare. Pricing takes under a minute.

4. Biggest differences first

The list starts with the biggest. A reason marked "not yet known" is the one to look at.

fore any correction by payroll staff. A staff-corrected timesheet shows both.

6. Export, or report it

Export what is shown as CSV. If FastTrack is right and the system is not, send Seizan the timesheet number.
